In our project we want to respond to the problem that some of the current problems and issues in the implementation of activities for young people is not always given sufficient attention, especially working with ICT, covering topics such empowerment, employability and entrepreneurship. The fundamental shortcoming we also found on the impact of projects and related activities. Therefore we decided to implement this training which will be based primarily on understanding the problems of "3E" and will solve partial problems of partner organizations, it will serve as the exchange of good practices and it will affect the rights of the problematic issues in the preparation and implementation of youth projects - impact and promotion.

### **Objectives:**

- 32 active young people in working with youth understand better to the selected problematical issues in the preparation and implementation of projects in the field of youth.
- These participants are familiar with examples of good practice, they will be able to share their experiences and discuss selected issues.

- During this training they will test in practice the methods of lobbying, effective methods of working with modern ICT in the youth field (effective communication, current issues in the field), understand the issues, "3E" detail will work with the concept and activities for strengthening within their organizations, focusing also on job opportunities in the long-term impact with their projects.
- Participants will understand in more detail the issue of key competences in relation to YouthPass (competences we analyse from the perspective of Erasmus+ and EC, but also from a pedagogical point of view with regard to formal education).
